Projects

Bus Reservation & Booking System | [Link](#)

May' 25 - Aug'25

- Developed a complete terminal-based system for managing bus bookings using modular C++ and an object-oriented structure for clean separation of features.
- Implemented file handling for storing trip details, reservations, and system records to maintain persistent data across sessions.
- Added efficient search and seat-allocation logic using DSA concepts to ensure fast booking and real-time availability updates.

Tech Stack: | C++, OOPs, DSA, File Handling

Ballistics Recognition Tool | [Link](#)

Apr' 25 - May'25

- Built a ballistic recognition web tool using HTML, CSS, and JavaScript to provide an intuitive and responsive user interface.
- Integrated a PHP-based backend logic to process ballistic data and deliver accurate, real-time identification results.
- Designed a streamlined workflow that enhances data analysis efficiency and improves overall system usability.

Tech Stack: HTML, CSS, JavaScript, PHP

Training

Data Structures and Algorithms

Jun' 25 - Jul' 25

- Completed a 40-day skill development program focused on core data structures and algorithmic problem solving
- Worked on implementing arrays, linked lists, stacks, queues, trees, graphs, sorting and searching techniques.
- Solved practice problems and mini-assignments daily to strengthen logic-building and improve coding efficiency.

Certificates

- ChatGPT Made Easy - AI Essentials for Beginners (Udemy) | [Link](#) Aug' 25
